Sir:

**REQUEST FOR CONTINUED EXAMINATION**

In response to the Final Rejection dated December 21, 2007, and subsequent to the filing of a Response dated May 20, 2008, and receipt of the Advisory Action dated June 2, 2008, Applicant submits herewith a Request for Continued Examination and the following remarks. A Petition for an additional month extension of time is submitted in connection with this request.

**Remarks** begin on page 2 of this paper.

## Remarks

Claims 1-30 are pending in the current application.

Subsequent to the Advisory Action, the undersigned, Applicant's attorney spoke with the Examiner on June 11, 2008 and from this conversation, it was understood that there remains an issue which was first raised by the Examiner in the personal interview conducted on October 16, 2007, the use of the term "no coding".

As the Applicant had pointed out in the recent response and as he has maintained in all of the previous prosecution stages, the present invention eliminates the need to write code.

The confusion about this point stems only from the use of the terminology in the text, which the Examiner has interpreted to be inconsistent, i.e. the previous wording:

- 1) (see para. 0024, now removed) "~~substantially~~ free of the need to write computer source code;" and
- 2) (see para. 0019) "... no further coding is required once the solution is visually defined by the modeling language".

The second version, by use of the terms "no further coding is required" implies, in the Examiner's view, that perhaps some coding was required, and this is what the Examiner said in the personal interview in October.

In fact, this reading is incorrect, since it is clear that beyond the modeling phase using the visual programming language, there is nothing further required, including the writing of code. Thus, nothing further needs to be done since the visual definition of the software solution is now ready for execution by the run-time engine.

Therefore, the terminology "no further coding" simply means nothing further beyond the modeling phase.

Applicant agrees with the Examiner that the terminology explaining this point must be consistent.

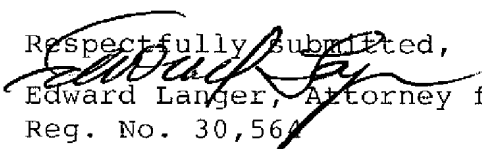

In light of this, the statement "no further coding" should be taken to mean no further coding of any type is required, i.e., nothing more needs to be done beyond the modeling phase.

It is herein respectfully requested that the Examiner reconsider the case in light of these explanations and clarifications.

The Applicant's attorney plans to contact the Examiner to determine the time frame for his examination and whether he requires further clarification prior to the examination.

#### **Conclusion**

Applicant submits that all outstanding issues have been addressed and that Claims 1-30 are in condition for allowance; such action is respectfully requested at an early date.

Respectfully submitted,  
  
Edward Langer, Attorney for Applicant
